

The A Level Business Curriculum

Over their KS4 maths course, students develop key skills necessary for success in Business. In addition, they have the opportunity to engage in Business applications of Maths in special problem-solving maths lessons.

The Business Curriculum at CCGS is Ambitious, Sequenced Carefully, Principled, Inclusive, Research-informed and Enriching.

Ambitious	Sequenced	Principled	Inclusive	Research informed	Enriching
Students will be challenged by the economic and financial concepts of this course. Investigation will take place into how a variety of economic factors will influence the decision making within a business. Furthermore, several financial accounting methods will be learned and applied to a variety of different contexts.	The curriculum is clearly sequenced and structured allowing students to gain a clear understanding of how a business operates both internally, through the covering of such functions as marketing, human resources and accounting as well as a realisation that businesses are affected by external influences. The course is synoptic by nature with interlinking areas throughout.	There is clear focus on how stakeholders affect and are affected by business decisions. Students will engage in ethical debates as well as considering the economic and financial consideration of business decisions. All business decisions are analysed and evaluated, then judgement will be shown about the best course of action within a context.	The curriculum is carefully sequenced to build upon prior learning and to develop a more in-depth understanding of business. All concepts are learned from scratch. Throughout the course there is opportunity for reflection and review and revisiting of the topics where necessary.	In Business, we utilise well documented research to underpin our teaching and learning. The widely renowned "Rosenshine Principles" form the basis of our teaching style, where new content is introduced by the expert teacher, students have opportunities to expand their understanding through discussion tasks, paired work or shared learning, followed by opportunities for students to independently practice to cement their understanding. We make use of frequent review of learning, using data-driven instruction techniques to help close gaps where they occur.	Alongside the A Level, students are given the opportunity to develop their business skillset through activities such as presentation work and the use of computer software such as Excel and Canva. The course lends itself to application of real world examples leading to a deeper understanding of the business world and its surroundings.
