

Mah Jamal

I studied Maths, Biology & Chemistry at A-Level and I studied Physics at AS-Level.

I left Chatham House Grammar School in summer 2013.

I am currently studying Prosthetics and Orthotics BSc (Hons) at the University of Salford Greater Manchester. I have a full timetable Monday-Friday, though the time each day varies. In P&O we make and provide amputees with artificial limbs and we also provide braces for patients with limbs that have problems in functioning. To be able to understand and appreciate the need for such devices it is necessary to learn a bit about the human anatomy. In learning human anatomy, we learnt about muscles contraction and conduction of nerve impulses, along with much, much more. Though having studied Biology, it made some aspects of the course I'm studying easy. For example, the in depth learning of muscle contraction and nerve impulses at A-Level Biology (which took weeks) was covered in a couple of hours, at university, so I am glad that I learnt it at A-Level.
